-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on November 15, 2004 has been entered.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 24-31, 33-41, and 43-48 are rejected under 35 U.S.C. 103(a) as being unpatentable over Amen et al (US 4851239) in view of Norris (US 3671459) and Jackson (WO 81/00061).

Amen et al disclose a shelf-stable aerated yogurt comprising milk ingredients, an emulsifier, gelatin, a starter culture, and conventional components (see entire document).

The claims differ as to the specific use of a hydrated emulsifier.

Norris discloses the conventional use of a hydrated emulsifier in food products (see entire document).

Jackson discloses the conventional use of a hydrated emulsifier in food products (see entire document).

In the absence of a showing to the contrary, the limitation as to shelf life is no more than expected as the same components are used.

It would have been obvious to a person of ordinary skill in the art, at the time the invention was made, to use the hydrated emulsifiers as taught by Norris and Jackson in that of Amen et al as the use of a hydrated emulsifier is conventional in the art and merely a matter of choice.

Applicant's arguments filed October 18, 2004 have been fully considered but they are not persuasive.

Applicant argues that Amen et al teach a yogurt product and that the references are not combinable.

Amen et al disclose a shelf-stable aerated yogurt comprising milk ingredients, an emulsifier, gelatin, a starter culture, and conventional components (see entire document). Yogurt is a milk composition. Applicant's claims do not define over that of the prior art.

In response to applicant's argument that there is no suggestion to combine the references, the examiner recognizes that obviousness can only be established by combining or modifying the teachings of the prior art to produce the claimed invention where there is some teaching, suggestion, or motivation to do so found either in the references themselves or in the knowledge generally available to one of ordinary skill in the art. See *In re Fine*, 837 F.2d 1071, 5 USPQ2d 1596 (Fed. Cir. 1988) and *In re*

Jones, 958 F.2d 347, 21 USPQ2d 1941 (Fed. Cir. 1992). In this case, all of the references disclose the conventional use of emulsifiers in the food art.

Applicant claims a milk composition, which is the same as that disclosed by Amen et al. Applicant's claims do not define over that of the prior art. In the absence of a showing to the contrary Applicant uses known components to obtain no more than expected results.
